

Reading Comprehension

Read the passage to answer the following questions:

Traffic lights are very important. Because they help drivers know when to stop and go. Traffic lights were first introduced in December 1868 in London. Traffic lights change to three colors: green, yellow and red. Drivers must know what each color means.

Green means go. When the traffic light is green drivers can go. When one side of traffic has a green light, the other side has a red light.

Yellow means slow down. When the traffic lights turn yellow, a driver needs to slow down and get ready to stop. A yellow light signals to the drivers that a red light is coming soon.

Red means stop. When the traffic light is red, cars must stop. The cars have to wait until it is their turn to go. It is important for driver to stop at the right time.

Traffic lights keep drivers safe on the road. If everyone follows the rules of the road, people can get places quite quickly and safely.

1- Why traffic lights are very important ?

- | | | | | | |
|---|---|---|------------------------------------|---|--|
| A | Because they help drivers know when to stop and go. | B | Traffic lights are very important. | C | Drivers must know what each color means. |
|---|---|---|------------------------------------|---|--|
